

AprivaPay™ Plus

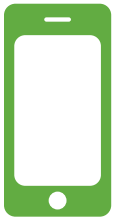

Simplified mobile payment acceptance — and more.

AprivaPay™ Plus

AprivaPay Plus turns an Apple or Android device into a mobile point of sale. This streamlined application is geared towards small and mid-sized merchants, and can be used in any number of venues – storefront or mobile. From a local in-store apparel shop or eatery, to an art dealer participating in a local festival, to a tow truck or taxi, it's an affordable, secure way to take payments. It's also ideal for seasonal merchants who may not need year-round coverage but do need a reliable service when business picks up.

FEATURES AND BENEFITS

SETTINGS AND RECEIPTS

Merchants can easily set sales tax and tipping settings right within the app. Send receipts to customers via email or text message with the option to have copies sent to the merchant. Sales history can be viewed and searched, along with the option to refund transactions.

FLEXIBLE AND FAST

Merchants can simplify record-keeping by running both cash and card transactions within a single app. They may also create an inventory which can be used to quickly ring up sales. Items can be defined with set prices, bar codes, and photos.

MULTIPLE USERS

Supports up to 10 active devices per account. It's ideal for a business with multiple field personnel, such as a food delivery service or home repair company. AprivaPay Plus allows them to swipe the card, improving Interchange qualification over manual entry.

SECURE

AprivaPay Plus supports encrypted card readers, preventing another app from accessing confidential card data on the mobile device. Using a card reader also enhances customer confidence by avoiding the risk of a hand-written card number being lost or stolen. Additionally, all transaction information is securely stored on the Apriva Payment Gateway, eliminating the risk of payment card information being recovered from a lost or stolen device.

CUSTOMER SUPPORT

Apriva provides customer support 24/7 to give you and your merchants the support you need to operate efficiently and effectively.

FAST

Everything from the technology to the screens has been enhanced to make paying the easiest part of the sale. Just plug the reader into the device and it's ready to go. We've made each step intuitive and free of unnecessary fields.

ABOUT APRIVA

Apriva leads the way in wireless payment processing and secure mobile communications. Our customers benefit from fully-managed, end-to-end security solutions that incorporate hardware, software and network infrastructure, and management tools. That means businesses of all sizes and government agencies use Apriva technology to communicate with confidence – using the networks and devices they favor.
